

Project Report Template

1. Introduction

1.1 Overview

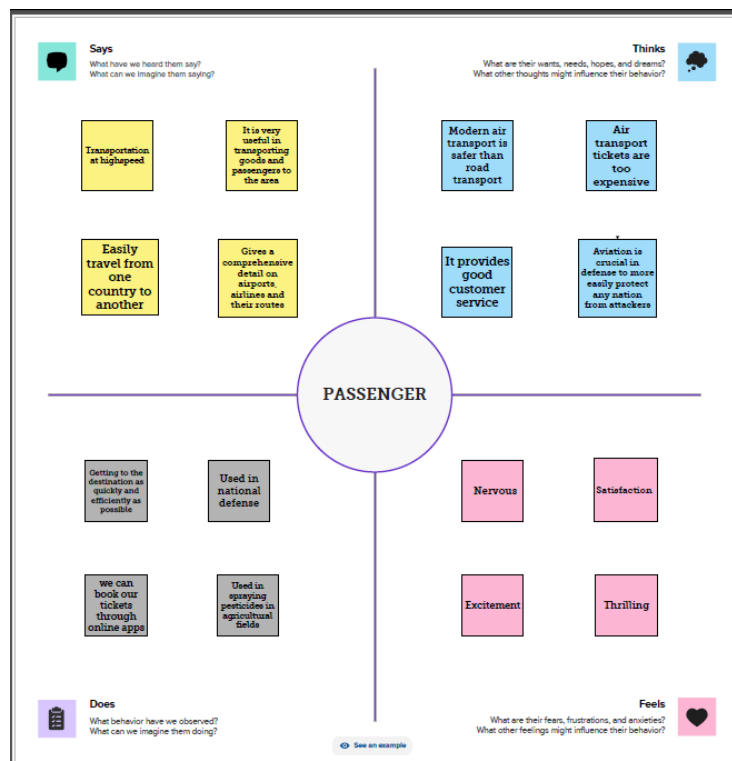

The project about the global transportation it helps to understand the updating the data source of collection of information on airports and airlines and their routes.

1.2 Purpose

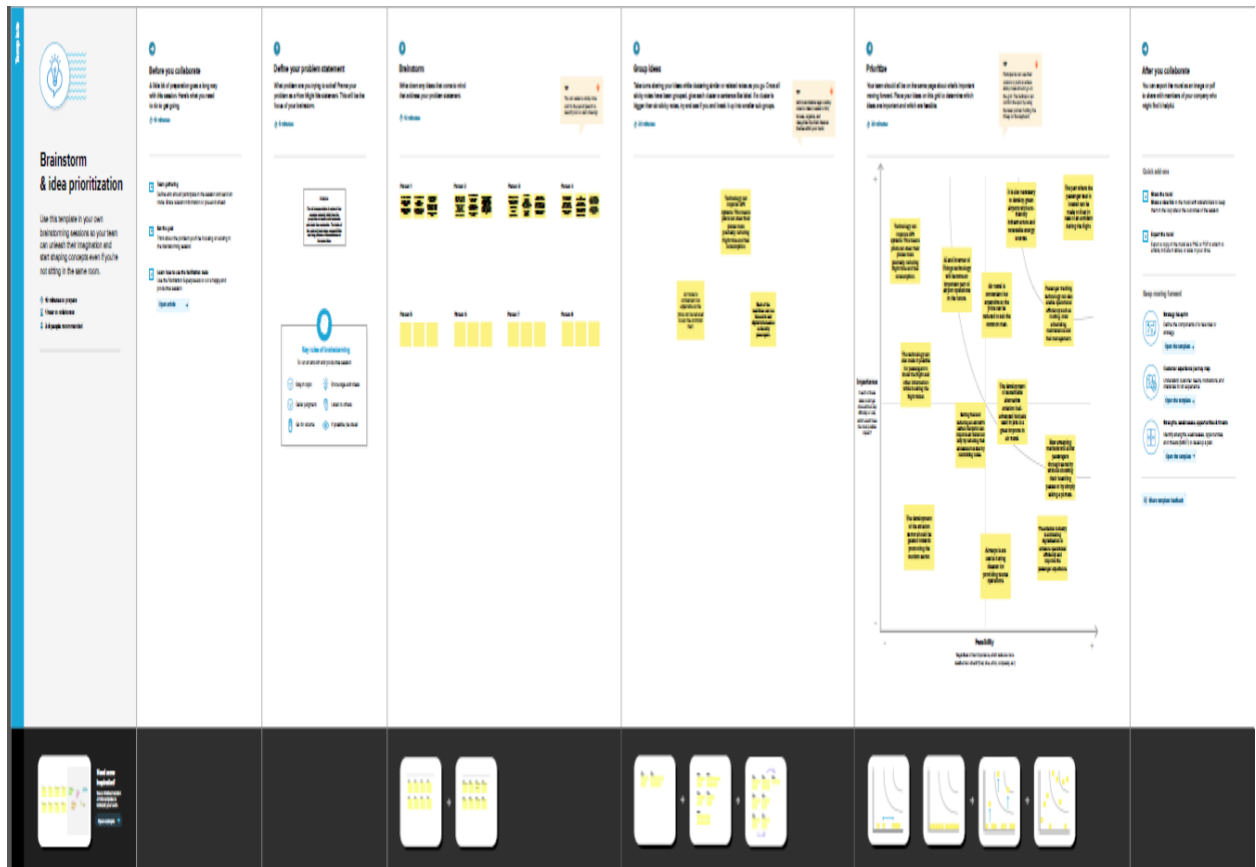

The project's main purpose is too knowledge a people about air transports services and details about the time zone and routes of airlines and airports.

2. Problem Definition & Design Thinking

2.1 Empathy map

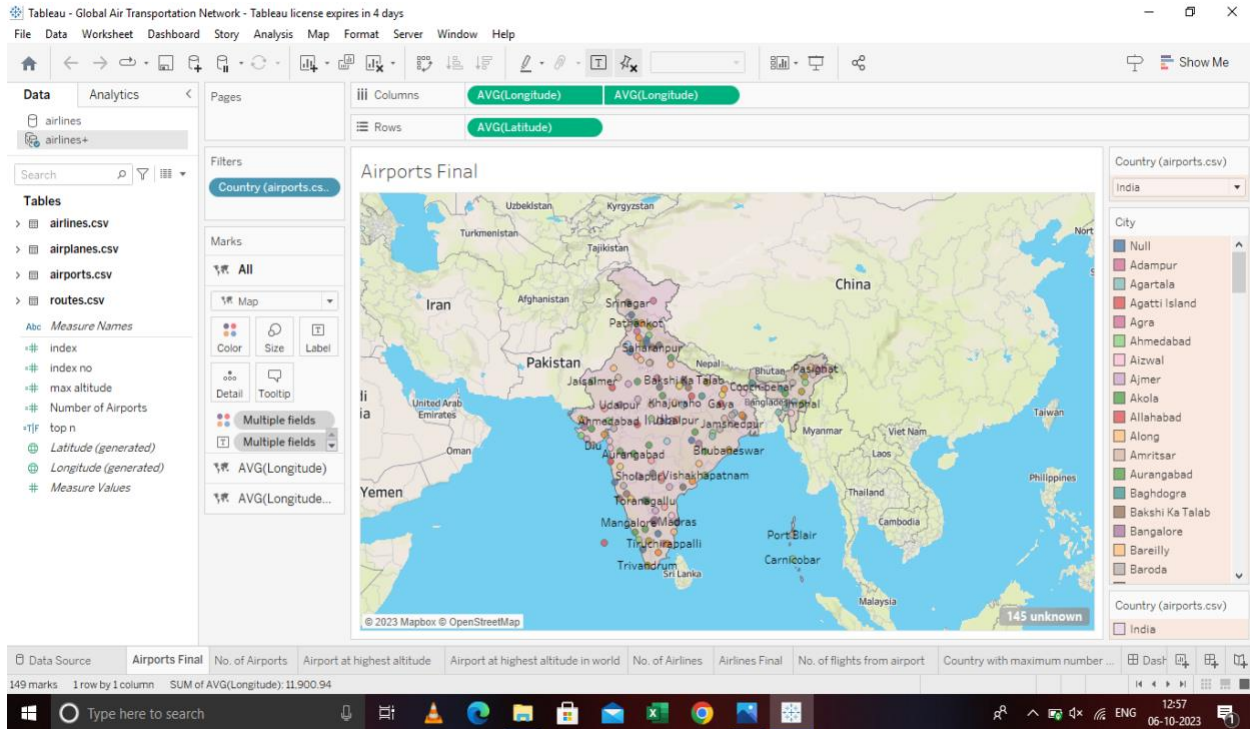

2.2 Ideation & Brainstorming Map

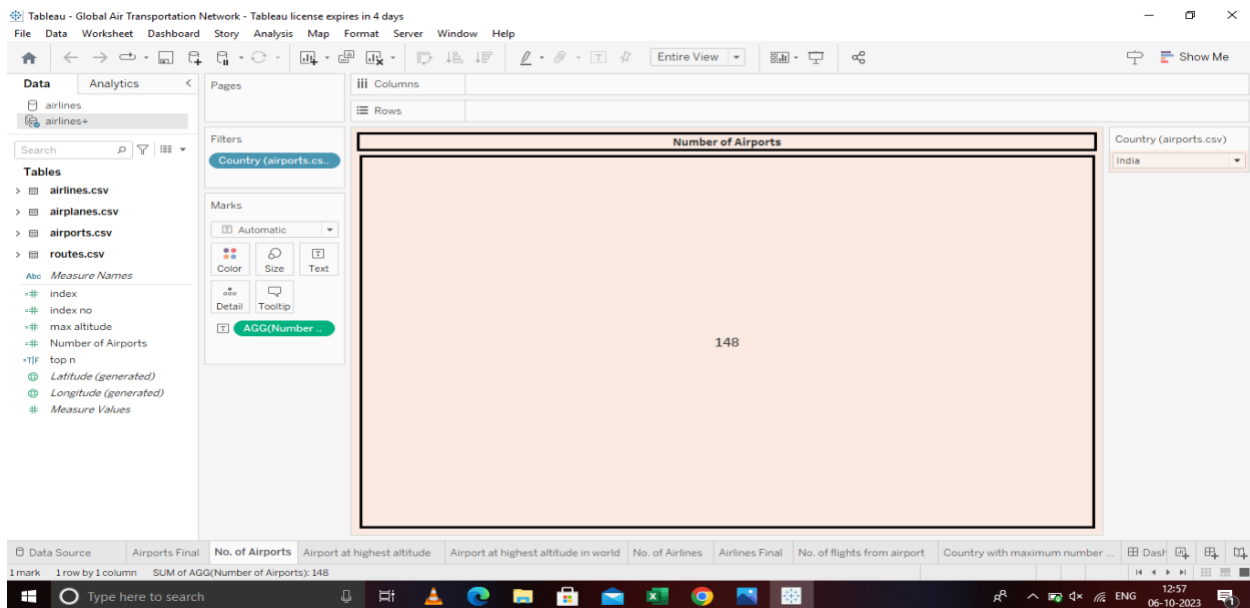

3.Result

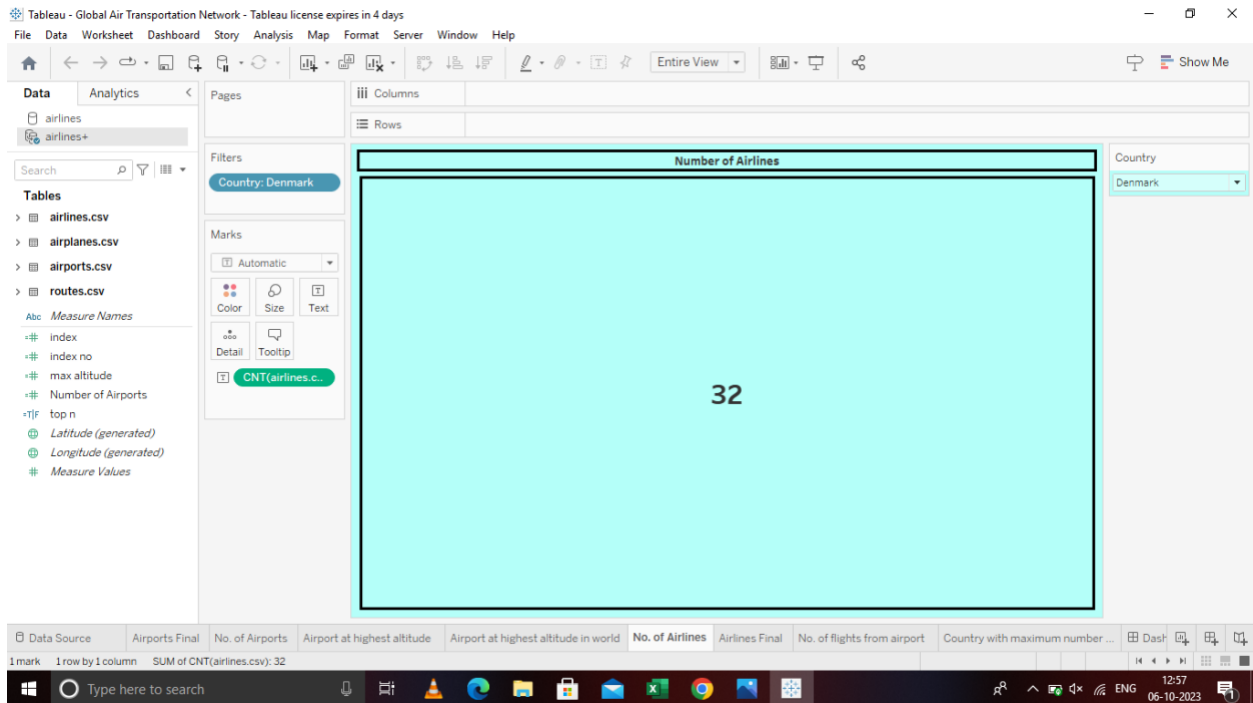

3.1 Airports Final

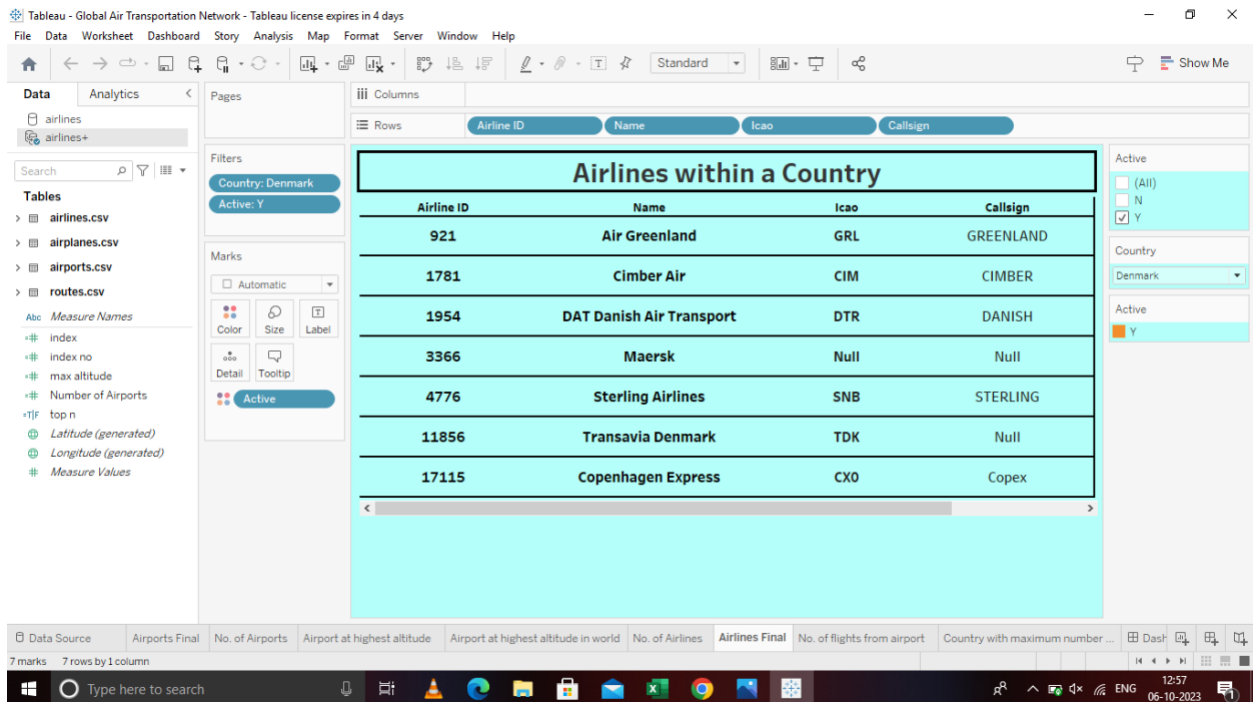

3.2 Number of Airports

3.3 Airport at Higher Altitude within a Country

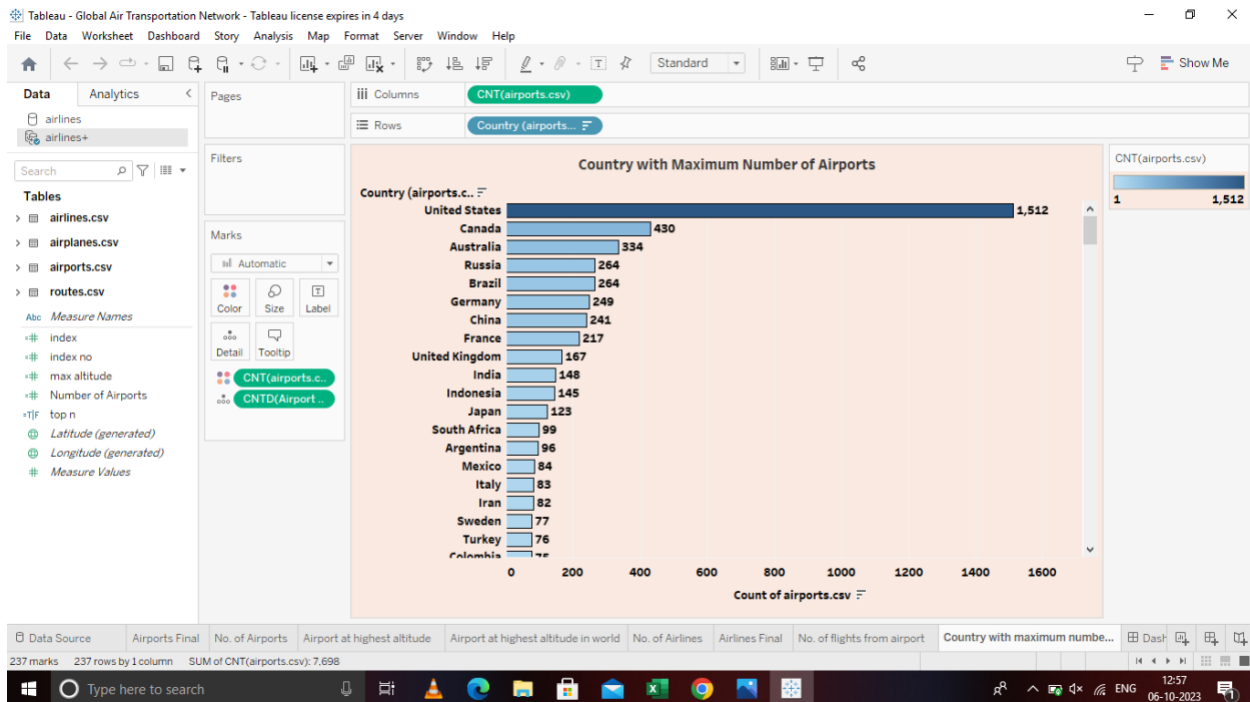

3.6 Airlines within a Country

3.7 Number of Flights from Airport

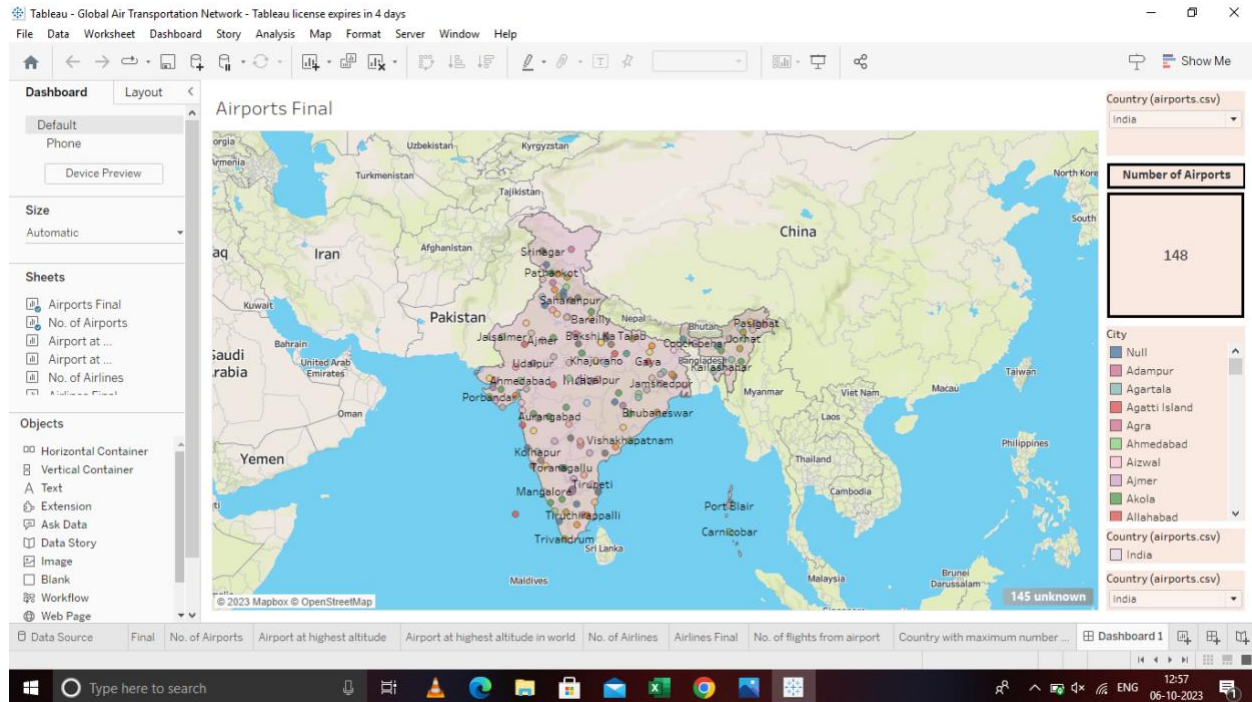

3.8 Country with Maximum Number of Airports

Global Air Transportation Network

World Map Showing Countries with details of Airports. Table showing List of All Airlines within the countrv. Table showing Airports which are at Highest Altitude in the world Bar Graphs showing Countries with Max No. of Airports & No.

Airport at Highest Altitude within a Country

index no	Name (airports.csv)	City	ICAO (airports.csv)	
1	Zhezkazgan Airport	Zhezkazgan	UAKD	1,250
2	Yubileyniy Airfield	Baikunur	UAQN	

Airports at Highest Altitude in World

Name (airports.csv)	City	ICAO (airports.csv)	
Daocheng Yading Airport	Daocheng	ZUDC	14,472
Qamdo Bangda Airport	Bangda	ZUBD	14,219
Kangding Airport	Kangding	ZUKD	14,042
Ngari Gunsa Airport	Shiquanhe	ZUAL	13,355
El Alto International Airport	La Paz	SLLP	12,913
Capitan Nicolas Rojas Airport	Potosi	SLPO	

Country (airports.csv)
Kazakhstan

3.10.4

4. Advantages & Disadvantages

Advantages:

- ❖ Air Transportation offers the fastest shipping
- ❖ High standard of security
- ❖ Capable of traveling long distance in short periods
- ❖ Defence service to protect any nation
- ❖ Useful during natural disasters

Disadvantages:

- ❖ High cost in air ticket
- ❖ Restriction on goods

- ❖ **Undependable and risky it depends on weather conditions**
- ❖ **Unfit for drop bulky goods**
- ❖ **Noise pollution**

5. Applications:

- ❖ **The development of air transportation network that are more efficient, safe and environmentally sustainable**
- ❖ **This can be used by investors to identify promising sectors for investment in the industry**
- ❖ **Understanding of the air transportation network to improved air quality and reduce carbon emissions.**

6. Conclusion:

In this unlocking the insights of air transportation we have used data visualizations and dashboard and story. In the visualizations we have used world map, table and bar graph. In the dashboard we use all the visualization should be applied in the correct way. In

the story, we used the visualization and add the caption above the chart.

7. Future Scope:

- ❖ The future of the aviation industry increases the tourism**
- ❖ Government policies supporting the industry**
- ❖ Emerging technologies are reshaping with robotics, artificial intelligence, the internet of things, aircraft system**
